Suggestions - If any

9 responses

No

it is better to provide course materials one week before starting course

All professors taught us very well and we learnt a lot in related sessions.

We can add art & science topic for computer students also. This gives us idea about writing the proposals. Just a suggestion.

Thanking you.

Mostly say, It was pleasure to be with these three professors, got different experiences from them.

Thank you

Very informative Sessions

If any Deep learning related content can be added to Course that will be really helpful information for students.

If more number hours would be allocated to Computational learning then it can be discussed in details which will be helpful for FoCS research scholars.

More focus on AI and Data Science related papers and request to allocate more number of hours for computer science.

Art and science also needed for Computer science students.
