

ATHARVA

Dec'24
Edition 77

TABLE OF CONTENTS

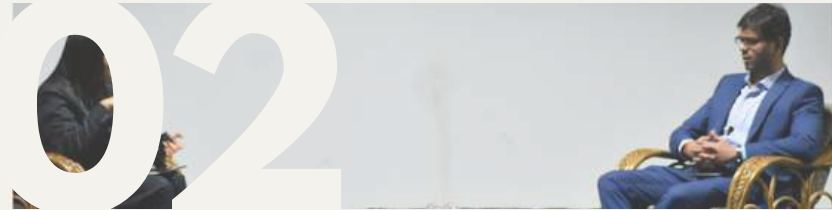

Editor's Note

This edition features inspiring alumni interactions: Bridging Generations with Pratik Deshpande, Christmas Cheer, Parivartan - 9th Integrity and Ethics Conclave, Machine Learning lecture by Rahul Nair, and exciting theme launches: Graffiti and TEDxSIUHinjewadi.

Bridging Generations

Pratik Deshpande, EY UK Manager and author, inspired students with insights on leadership, certifications, career growth, and information security excellence.

SCIT's Christmas Celebration

SCIT celebrated Christmas with vibrant performances, fun games, Santa surprises, heartfelt confessions, and festive joy, creating cherished memories.

Parivartan: 9th Edition of the Integrity and Ethics Conclave

Parivartan 9th Edition celebrated ethical transformation with insights on sustainability, responsible journalism, inclusivity, and dynamic industry practices, featuring impactful talks and performances.

Graffiti Theme Launch

SCIT's flagship fest, Graffiti, launched with inspiring talks, captivating performances by Eklavya, Symbeats and Black Sheep Band,

TABLE OF CONTENTS

Exploring Machine Learning and Transfer Learning

Rahul Nair's session on AI, ML, and transfer learning provided hands-on insights into neural networks and model optimization.

TEDxSIUHinjewadi Theme Launch

TEDxSIUHinjewadi launched its theme, "Samudra Manthan: Waves of Transformation," with captivating performances, inspiring ideas, and vibrant energy.

Faculty Spotlight

Highlighting the expertise, achievements, and contributions of SCIT's distinguished faculty members.

Senior Scoop: Tales & Tips

Insights from Senior Committee Members: valuable advice and experiences shared by seniors to guide and inspire students.

Star Alumnus

Celebrate the achievements and success stories of our outstanding alumni in their respective fields.

EDITOR'S NOTE

Dear Readers,

A warm welcome to the December edition of Atharva!

As the year draws to a close, SCIT is abuzz with the festive spirit and a calendar full of exhilarating activities that embody the dynamic ethos of our institution.

This month featured inspiring moments, from alumni interactions and festive cheer to thought-provoking conclaves and theme launches for flagship events. Highlights include Bridging Generations, an alumni interaction with Pratik Deshpande, Manager at EY UK, where he shared his journey in information security, leadership, and time management.

The 9th Integrity and Ethics Conclave, Parivartan, celebrated ethical transformation with insights on sustainable practices, inclusive events, and responsible journalism.

On the festive front, SCIT's Christmas Celebration wrapped up the year with joy and togetherness. Students and faculty came together to spread holiday cheer, creating lasting memories through music, decorations, and warm camaraderie.

On the technical front, Rahul Nair's guest lecture on Machine Learning and Transfer Learning captivated attendees with hands-on demonstrations and industry insights. The launch of Graffiti's theme combined inspiration, music, and electrifying performances, setting the stage for the much-anticipated fest.

The TEDxSIUHinjewadi theme launch—"Samudra Manthan: Waves of Transformation"—explored the interplay of challenges and progress, promising an inspiring TEDx journey ahead.

We are proud to feature Ms. Manasi Dalwani as this month's Star Alumna. As a Senior Data Strategist at Google, she has excelled in enhancing user safety and combating fraud through data analysis.

Stay tuned for more insights, stories, and updates as SCIT continues to lead with innovation and passion!

Bridging Generations: Alumni Interaction with Pratik Deshpande

We had the privilege of hosting Pratik Deshpande, an accomplished alumna from the 2014-2016 batch, for an engaging alumni-student interaction session. Pratik, currently a Manager at EY UK, is celebrated not only for his stellar career in information security but also for his achievements as a three-time author and a record-holder in the Limca Book of Records.

The event commenced with a warm welcome by Dr. Kanchan Patil, who felicitated Pratik for his contributions. Moderated by Shrutika Banerjee, the session transitioned into a captivating discussion, with Pratik reminiscing about his days at SCIT. He fondly shared memories of being part of various committees and emphasized how his time at SCIT shaped his career trajectory in information security.

Pratik's passion for writing, especially on leadership, stems from his deep interest in exploring diverse perspectives on leadership traits. His latest book, "Bull's Eye Leadership," aimed at Gen Z, reflects his insights into how leadership evolves—some individuals are born leaders, while others develop these traits through experience. He stressed that leadership is not one-size-fits-all; it involves understanding team dynamics and adapting to situations. He also touched upon the art of time management and highlighted the contrasting work-life balance cultures in the UK and India. The discussion culminated in Pratik's account of his professional journey at EY UK, where he manages audit and SOC 1/SOC 2 engagements for banking clients. He underscored the significance of certifications like CISA, CISP, and CISM in building robust ISMS frameworks within organizations.

The event left students inspired by Pratik's multifaceted achievements and provided invaluable insights into leadership, career growth, and life beyond SCIT.

Priyajeet Ghosh

Wrapping Up the Year with Festive Spirit: SCIT's Christmas Celebration

This year, the SCIT family celebrated Christmas with a joyful event on 21st December. The celebration began with lively anchoring by Eklavya, featuring Harsh Nautiyal, Arjun Shivnani, and Aniket Dharme, who kept the energy high throughout the night. The event had a perfect mix of music and dance. Sagar Goel amazed everyone with his guitar performance, while Gaurav Dhale's soulful singing left the audience spellbound. Anubhav Mathur added sparkle to the event with his stunning dance performance, and Symbeats, led by Meenakshi Daga and Prasenjeet Gangawane, gave an unforgettable performance.

A fun game session hosted by Natesh added to the excitement. Highlights included Kshitij's ramp walk, Rakshit Pande doing pushups with slippers in hand, and lemon shots by Bhushan. These activities brought laughter and energy to the room. The performances continued with a heartfelt act by Hemanshu, followed by a short yet beautiful performance by the DSDA girls. Symbeats returned with another electrifying show, leaving the audience wanting more.

The night wasn't just about performances. Santa made a surprise appearance, delighting everyone by distributing gifts. The SCIT confessions segment revealed fun and light-hearted secrets, bringing smiles to all. The event was a perfect blend of talent, fun, and holiday spirit, leaving everyone with cherished memories and festive vibes. SCIT truly knows how to celebrate Christmas with love and laughter!

Varad Kundan Raut

Parivartan: 9th Edition of the Integrity and Ethics Conclave

The 9th Edition of the Integrity and Ethics Conclave, Parivartan, was a celebration of ethical transformation and innovation. Hosted by SCIT, the event emphasized integrating ethics into industry practices to achieve sustainable success. The event began with a lamp-lighting ceremony, symbolizing hope and integrity. Dr. Tamal Mondal, Mentor at GL-ITBM, delivered the welcome speech, highlighting the need for ethical industry practices that balance innovation and sustainability.

Keynote speaker Dr. Ravindra Utgikar, Director at Bhau Institute, shared valuable insights on maintaining integrity in evolving business environments. His emphasis on ethical practices in a dynamic macroeconomic landscape inspired the audience. Other notable speakers included Mr. Anurag Doshi, who explored SwiftEthos in quick commerce, and Ms. Shipra Rana, who shed light on responsible journalism. Mr. Ananthanarayanan V provided insights into ethical vendor practices and inclusivity in events, paving the way for sustainability.

The event also featured captivating performances. Ekalavya, SCIT's Drama Committee, delivered a thought-provoking play that resonated with the audience, while Symbeats showcased the media industry's evolution through an energetic dance performance. Musical duos Anirban Datta and Subhradeep Ganguly brought a melodic touch to the conclave. Dr. Kanchan Patil, Deputy Director at SCIT, concluded the event with a heartfelt vote of thanks, appreciating the speakers, students, and faculty. Parivartan reinforced the importance of ethics across industries, inspiring everyone to drive positive change for a better tomorrow.

Varad Kundan Raut

Graffiti Theme Launch

The much-anticipated flagship fest of SCIT, Graffiti, kicked off with an exciting theme launch, setting the stage for another spectacular edition of the event. The Graffiti Theme Launch Event started with an engaging introduction by Kaustubh, the moderator, who set the tone for an exciting and memorable day. The morning session, organized by Under 25 SCIT X Graffiti, began on an inspiring note, with Kevin Zingkhai sharing his remarkable journey. Kevin, a 12th-pass achiever, started working at the age of 16 due to challenging family circumstances. From his first job at a call centre to becoming a flight attendant with Jet Airways and later joining Qatar Airways, his story was a testament to resilience and determination. Kevin spoke about the cultural differences between the airlines and emphasized the importance of learning from failures. He concluded by announcing his upcoming role in a web series, leaving the audience motivated.

This was followed by a musical treat from the Konnect Band, whose soulful melodies captivated the audience. Ashwin Adwani's enchanting performance further added magic to the day. As the evening unfolded, a series of captivating performances took centre stage. Eklavya, with their dramatic storytelling, and Symbeats, with their electrifying dance moves, thrilled the crowd. The Konnect Band returned with another melodious act, winning hearts yet again.

The highlight of the evening was the dynamic performance by The Black Sheep Band, whose powerful music set the stage ablaze and kept the audience on their feet. Following this, the theme launch dazzled everyone with a spectacular display of lights and visuals, creating a memorable moment. The event concluded on a high note with an exhilarating DJ Night, where attendees danced the night away, celebrating togetherness and joy. The day beautifully combined inspiration, creativity, and entertainment, leaving the audience with unforgettable memories and a renewed spirit to chase their dreams.

Varad Kundan Raut

Guest Lecture by Rahul Nair: Exploring Machine Learning and Transfer Learning

The Guest Lecture Committee of DSDA hosted an insightful session on December 1st, featuring Rahul Nair, Senior Data Scientist at LTIMindtree. With expertise in neural networks, machine learning (ML), and transfer learning, Rahul captivated the audience with a blend of theory and practical insights, emphasizing AI's transformative role across industries.

Rohan Patil, a member of the Guest Lecture Committee-DSDA, opened the session with a warm welcome and an introduction to Rahul's extensive experience in AI and data science. Rahul began by outlining the fundamentals of neural networks, discussing their architecture and applications in image and speech recognition. He differentiated traditional software systems from ML systems, highlighting how ML relies on pattern recognition from data instead of explicit programming.

The lecture covered learning paradigms like supervised learning (label-driven), unsupervised learning (pattern detection in unlabeled data), and reinforcement learning (feedback-based). A deep dive into deep learning techniques, including Convolutional Neural Networks (CNNs), showcased how these models process data layers akin to the human brain. A key focus was transfer learning, where Rahul illustrated the efficiency of leveraging pre-trained models like those from ImageNet to address new problems. This approach reduces time, cost, and the challenge of large dataset acquisition. Tools such as TensorFlow, PyTorch, and Keras were discussed for fine-tuning models by adjusting parameters like epochs and freezing layers.

The highlight was a hands-on session guiding attendees through the ML pipeline—data collection, cleaning, model training, and deployment. Rahul demonstrated tools like Gradio and Hugging Face for optimizing and monitoring model performance. The event concluded with a vote of thanks by Sridaran, a member of the Guest Lecture Committee-DSDA and a token of appreciation was presented to Rahul by Dr. Rajesh Deshpande. The session not only enriched students' understanding of AI but inspired them to explore its innovative applications.

Yuktha Mohan Pulukkul

TEDxSIUHinjewadi Theme Launch: A Night of Entertainment and Revelation

The iTELF committee hosted an unforgettable evening on 6 December 2024 with the much-awaited TEDxSIUHinjewadi Theme Launch. This event, filled with energy, creativity, and inspiration, set the stage for what promises to be an exceptional TEDx journey this year, culminating on 4 January 2025.

The evening began engagingly with a fun Movie Q&A session, where the audience enthusiastically participated, showcasing their cinematic knowledge. The laughter, camaraderie, and excitement during this segment created the perfect atmosphere to kickstart the event.

Next, a mesmerizing dance performance captivated the audience, blending grace and rhythm in a celebration of expression. The energy only amplified as the Konnect Band took the stage, delivering a soul-stirring musical performance that left everyone spellbound.

The highlight of the evening, however, was the grand reveal of this year's theme—"Samudra Manthan: Waves of Transformation" which draws inspiration from the boundless energy of the ocean, symbolizing the interplay of opposing forces—positivity and adversity, chaos and clarity—that drive progress. Just as the ocean holds hidden treasures, the churning of effort and ideas unveils our potential and shapes the future.

"Samudra Manthan" invites us to immerse ourselves in this ocean of transformation, where every ripple carries the potential to redefine boundaries. It celebrates technical brilliance, inspiring stories, and visionary thinking, all converging to create waves of change. This is where innovation surges forward, and transformations begin—an ocean of possibilities waiting to be explored.

With such an intriguing theme, TEDxSIUHinjewadi promises to deliver a captivating experience filled with thought-provoking ideas and inspiring stories. As the night closed with excitement in the air, the audience left with a sense of anticipation for what was to come. This year's theme, "Samudra Manthan," sets the tone for a journey of discovery, balance, and innovation that will leave a lasting impact.

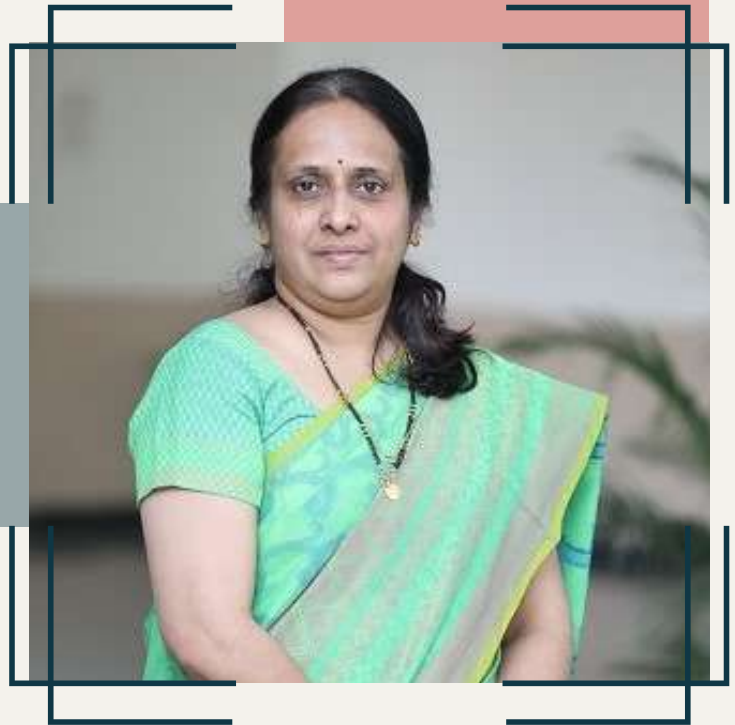

Yuktha Mohan Pulukkul

UNVEILING INSIGHTS

FACULTY SPOTLIGHT

Dr. Nisha T N

Assistant Professor

Q: What is the most unexpected skill you picked up in your career?

A: I believe the skill I picked up during my career is the technique of connecting everything with real-life situations. While teaching technical courses, I started taking examples from real life to explain the concepts, I believe this might help them understand the concepts better.

Q: What would be your most embarrassing tech fail?

A: Being a teacher of information security, forgetting my own password is the most embarrassing tech fail. It's ironic to forget something I always emphasize to my students!

Q: If you had to pick a completely different career, what would it be?

A: My alternate career would still be teaching because it's not just a profession for me—it's a passion. I genuinely enjoy sharing knowledge, engaging with students, and continuously learning. It may not be teaching an MBA. Definitely, I'd still be in the education field.

Q: What is that one thing you get reminded of when you think about your hometown?

A: When I think of my hometown, I'm reminded of family, my childhood home, delicious food, and countless warm memories. It's a place filled with love, simplicity, and the comfort of my roots.

Q: Which is your favourite travel destination, a place you would like to go to de-stress yourself?

A: My favorite travel destination to de-stress is my hometown. It's where I feel most at peace, surrounded by familiar faces, cherished memories, and the calming rhythm of home life.

SENIOR SCOOP : TALES & TIPS

From Guest Lecture Committee-ITBM

Abhishek Shinde

Yashika Jadhav

Q: Is there a particular sport or game you enjoy playing or watching?

A: Absolutely! Football has always been a passion of mine, both as a player and a fan. Winning the SIC FUTSAL tournament two years in a row was an unforgettable experience, and nothing beats the rush of competition. But when I'm not on the field, you'll probably find me playing CS2 and Valorant. I've hit Radiant, the highest rank, and have won multiple tournaments like Aorus, TEC, and ILG Pune. Whether it's on the pitch or in the game, I love the intensity, the strategy, and the thrill of winning.

Q: Do you have a favorite type of music or any songs that bring back fond memories?

A: Rap and hip-hop all the way. There's something about the lyricism, storytelling, and energy of artists like Eminem, Biggie, Tupac, and Eazy-E that just hits differently. Their music is timeless, and every track brings a different kind of vibe—whether it's motivation, nostalgia, or just a good beat to zone out to.

Q: Do you have a favorite memory from freshman orientation or welcome week?

A: The one-day trip to Surya Shibir was easily the best part of freshman orientation. It wasn't just about the destination—it was about the experience. That trip broke the ice, turned strangers into friends, and set the tone for the rest of college. Between the adventures, the conversations, and the laughs along the way, it was the perfect way to kick things off.

Q: What's the funniest or most unexpected thing you've heard a professor say?

A: During an IT Infrastructure lecture, the professor randomly started narrating a Ganga Yamuna story—it was so hilarious and completely out of the syllabus!

Q: Which subject did you think would be a nightmare but turned out to be interesting?

A: Has to be BPM! Almost failed the exams, but honestly, it felt like riding a roller coaster blindfolded. It was terrifying but oddly fun!

Q: What's the one habit you developed in college that will stick with you for life?

A: Late night walks in the campus have become my thing. Also, midnight snacks while watching podcasts is now a habit I can't let go off!

From Sports Committee

**Vishwajeeth
Gahawar**

Q: What's the best "networking hack" you've learned while pursuing your MBA?

A: For me, the most effective networking strategy was active participation. College events, committees these weren't just social activities, they were crucial for personal growth. They helped me develop my personality, build meaningful connections, and create lasting bonds. These experiences are invaluable.

Q: What's one thing about MBA life that surprised you the most once you started?

A: The sheer pace of life was the biggest surprise. Endless assignments, multiple subjects, and long classes created a whirlwind of activity. It was intense and demanding, but looking back, the stress, deadlines, and the constant push to learn and grow shaped me into a better version of myself. It was all worth it.

Q: What's the funniest thing that's happened to you during an MBA class?

A: During a second-semester exam, while pondering the next question, I stumbled upon a shopping bill in my desk. Distracted, I briefly examined it. The invigilator, misinterpreting my actions, thought I was cheating with a cheat sheet. Chaos ensued! She called the exam incharge Gajanan sir, and it took some convincing to explain the situation. When I finally showed her the innocent shopping bill, the entire class erupted in laughter. It was definitely a memorable moment.

**Manish
Singh**

Q: If you could have one superpower for a day to help you with your MBA, what would that be?

A: If I could have one superpower for a day to help with my MBA, it would be the ability to decipher people's minds and motives behind everything they say or do.

Q: What three items would you include in an "MBA Survival Kit" for future students?

A: Earphones – Your ultimate escape route during never-ending group calls or when you need to drown out the sound of someone passionately debating case studies at 2 AM. To ignore all the drama that is happening around you.

Friends – for your tough times. The unofficial therapists, chai buddies, and partners-in-procrastination who remind you that you're all in this chaos together. – A well-organized plan – Because staying on top of assignments, presentations, and surprise quizzes without losing your mind is nothing short of a superpower.

Q: Where's the most unusual place you've worked on an assignment or prepped for an exam?

A: Definitely the back of a moving car during a long road trip. When I was visiting with my friends for the engagement of our mutual friend.

From Guest Lecture Committee-DSDA

Soumyadeep Chakraborty

Q: If you could rename your batch, what would you call it?

A: If I could rename my batch it would be "The Trendsetters" - because this DSDA Batch has surpassed their commitments towards academics as well as took the Committee work to a whole new level through their leadership and doing something more, even a little more.

Q: What's your go-to excuse for missing a class?

A: My go-to-excuse for not going to class would be that I'm really sleepy. I feel that is what I can never get enough of.

Q: If you could switch lives with any of your classmates for a day, who would it be and why?

A: If I could switch life with someone it would be Niladri from Placement Cell - because I would love to work a lot under pressure and take up the responsibility of placing my entire batch and also manage my studies.

From Academic Committee

Sruthi Ashok

Q: What's the most unexpected lesson you've learned from a group project or teamwork experience?

A: During my MBA, I often found myself overwhelmed with projects, forgetting to pause and internalize my work and thoughts. As wise people say, I realized that quality matters more than quantity. If you are someone who counts milestones, please pause to cherish and create impact with your victories.

Q: What's your favorite thing about your major or field of study?

A: Majoring in Data Analytics has taught me the importance of understanding data and giving it purpose. People often get carried away with mere numbers and forget to bring life to it. Ultimately, the true value of data lies in how it serves your business or purpose.

Q: What's the most heartwarming or unexpected thing that happened to you during college?

A: The most heartwarming experience has been finding a family away from home. The unexpected part was earning a leadership position among a diverse crowd and excelling academically in a field that was entirely new to me. Thanks to me peers and my mentors

From ISR Committee

**Oshin
Rastogi**

Q: Who's the most unforgettable person you met during college and why?

A: The most unforgettable person I met in college was my creative friend, Riya. Despite the age gap between us, it never felt like it existed. Her constant support and the unique perspective she brought to every situation left a lasting impact on me. She was always there for me, and her kindness and creativity continue to inspire me.

Q: If you could create a new campus tradition, what would it be?

A: A tradition that could perfectly capture the spirit of our college would be a "Gratitude Week." Imagine a week where students and faculty anonymously exchange notes of appreciation and encouragement, it would create such a positive atmosphere! Another idea could be organizing an annual nighttime campus hike that concludes with stargazing and storytelling, fostering connection and nostalgia among everyone.

Q: Which place in the city became your squad's hangout spot?

A: Our go-to hangout spot was the floor above the gym. We'd gather there to listen to music, enjoy the cold breeze, and have heartfelt conversations with our friend group. It became our little sanctuary, where so many special memories were created.

**Sourima
Mondal**

Q: What's the one food from the canteen you'll never forget?

A: The one food from the canteen I'll never forget is the legendary Aloo Paratha with lots of butter—it was incredibly popular during our junior year!!

Q: What's the weirdest myth about college life that turned out to be true?

A: Attendance requirements will haunt you more than exams: That 75% rule is no joke!

Q: What would be your dream alumni event to attend after a few years?

A: Reuniting with my friends, reliving old memories, laughing at our college impressions of each other, and seeing how everything turned out just as we had dreamed during college.

From Alumni Committee

Shruti Sinha

Q: What is your favorite food spot in Pune and your favorite dish?

A: My favorite food spot in Pune is Cherie, a place I've visited only thrice, but it holds a special place in my heart. Each visit was during a different phase of my life with a different set of people, making it memorable each time. That said, my all-time favorite dish, remains biryani.

Q: One memorable moment that happened to you in SCIT?

A: One of my most memorable moments in SCIT was being a moderator for the alumni-student interaction event & hosting BCG Innovation Director on stage. Another cherished memory was hosting SCIT's 25-year celebration & finally seeing the Alumni Wall come to life!

Q: What is the one core value you picked up from SCIT that you will carry forever?

A: "One day at a time" is the mantra I learned at SCIT & will carry with me forever. The relentless pace of submissions, exams & committee work was overwhelming at times, but spacing things out made it manageable. Having a close group of supportive friends who constantly reassured me was a blessing.

Sera Chitgopkar

Q: What's your go-to way to unwind or de-stress during busy times?

A: Well, at the end of a long day, I like to make myself a nice meal and play the guitar and listen to music.

Q: What's a silly nickname or inside joke you have with your friends?

A: In college, we have this ongoing game of guessing what it is that anyone that enters the class will say. It is almost always accurate always catches the faculty off guard.

Q: What is your favorite food spot in Pune and your favorite dish?

A: There is this place called Bombay Paratha Company that has the most incredible kebabs. I can't go a week without having them.

Matrix Committee

**Riya
Jain**

Q: If your MBA experience had its own theme song, what genre would it be, and who would perform it?

A: Comedy rap with chaotic beats

Performer: Bo Burnham featuring a stressed-out MBA student
Reason: My MBA life felt like a rap battle between deadlines, group projects, and caffeine. Bo would perfectly capture the absurdity of juggling 10 things at once while cracking jokes about Excel sheets, group chats, and the never-ending quest for placement. Bonus points if he throws in a verse about how coffee replaced water in my life!

Q: Describe your college experience in three words.

A: Deadlines, Epiphanies, Misery

Q: What's your go-to way to unwind or de-stress during busy times?

A: Gardening and baking help me unwind—nurturing plants calms my mind, and creating delicious treats feels rewarding and soothing.

**Siddharth
Mahapatra**

Q: What's your favorite thing about your major or field of study?

A: Being able to **smartly** build entire projects within a span of few minutes with the help of the omniscient LLM tools (ChatGPT, haha!)

Q: What's a silly nickname or inside joke you have with your friends?

A: One of our friends calls us with the short version of our grandfather's names, so our gang consists of Bibhu, Chema, Kris, Romo & Gadad!

Q: What's the most creative way you've pulled an all-nighter or crammed for exams?

A: Working on our NLP chatbot till 5.30 in the morning, powered by a dozens of cans of Nescafe intense cafe and bags of chips!

STAR ALUMNI

Manasi Dalwani

We are delighted to present this edition's star alumna, Manasi Dalwani. She completed her Bachelor of Engineering in Computer Science from Gujarat Technological University. Following her undergraduate studies, she pursued an MBA in Information Technology Business Management at SCIT, graduating with the 2018-20 batch.

During her time at SCIT, Manasi interned at Google as a Program Management Intern and subsequently became a full-time employee as a Data Strategist. She was then promoted to Senior Data Strategist in just three years. In this role, she has successfully utilized data analysis techniques to identify and mitigate risks, improve user safety, and combat fraudulent activities.

Manasi's exceptional contributions have earned her notable recognition at Google, including two Spot Bonus awards. She received one in March 2023 for driving efforts to remove abusive content from Google Maps, resulting in a 30% decrease in badness rate. Another Spot Bonus was awarded in October 2023 for organizing and leading the Trust & Safety Geo Summit, showcasing her leadership and organizational skills.

Additionally, Manasi has actively contributed to nurturing talent by volunteering as an Intern Advisor at Google, exemplifying her commitment to growth and mentorship. Her journey is an inspiring testament to the impact of passion, expertise, and dedication.

Batch 2018 – 2020

Senior Trust & Safety Analyst
Google

This month, we are honored to celebrate our distinctive alumna, Manasi Dalwani who has distinguished herself through excellence in both the business program and tech spaces. After finishing her B.E. in Computer Science from Gujarat Technological University, she pursued her passion for IT and further advanced it with an MBA in Information Technology Business Management at SCIT. After interning at Google as a Program Management Intern, she joined Google as a full-time Data Strategist. With a 4-year track record with Google, focusing on enhancing Trust and Safety within Google Maps, she continues to make remarkable progress inspiring us all
