12	Total no. of students yet to be placed(without CNG/TNG/ Active Backlogs)	9
13	Total no. of students yet to be placed(with CNG/TNG/ Active Backlogs)	2
14	Student facing disciplinary action	1
15	Total no. of Campus placement offers	156
16	Percentage of eligible students placed	100 %

**Students' compensation Break-up**

Salary Band	No. of Students
Salary < 6 LPA	23
6 LPA <= Salary < 7.5 LPA	90
7.5 LPA <= Salary < 10 LPA	22
Salary >= 10 LPA	21

## Compensation Break-Up Report

## Sector Wise Placement Distribution

■ Consulting ■ IT/ITES ■ BFSI ■ E-Commerce ■ Media

## Symbiosis Centre For Information Technology - Placement Process

## PLC Activity Break-Up

### Data Collection

Personal and Academic data is collected from the students through Google forms.

### Profile Sheet

After proper verification of the data by the student themselves profile sheets are created containing personal, academic, professional and internship details of the candidates .

### Resumes

Student resumes are collected and photographs are affixed to them. Resumes and profile sheets are updated when the students upgrades himself/herself with a new achievement.

### Mock Interview and Mock GDs

The Placement Committee with the able guidance and instruction of the Placement Officer organizes Mock GD/PI sessions for the students to brush up their interview skills.

### Student Eligibility

Student eligibility is decided by the companies visiting campus.

### Pre Placement Training sessions

Companies visiting campus present pre placement training sessions for the students where the students get to know more about the companies visiting campus and simultaneously doubts regarding profiles, opportunities, pay break-up, etc are addressed. The PLC aids the above process.

### Pitching

Pitching in different companies is done by the placement team with guidance from the placement officer. The placement officer accompanies the committee for placement visits to major cities like Bangalore, Mumbai, Hyderabad, Pune, etc.

### Student Interest

Usually separate profile -wise student interest is taken before student data is shared with the companies.

### Campus Recruitment Process

Campus Recruitment process varies from company to company. It usually includes short-listing, Aptitude test, Group Discussions, Personal Interviews (HR & technical) and finally concludes with selection and job offer.

# National Seminar 2015

## 16<sup>th</sup> National Seminar

### Internet of Things: Convenience or Compromise?

National Seminar at SCIT organized by the Placement Committee, for the past 16 years has been an inimitable platform to critically assess the State of IT and related industries, from a multitude of dimensions. Over the period of time, National Seminar has become the platform where the best of the IT minds meet, understand and analyze the dynamics of the IT industry for the future.

State of IT'15 focused on Internet of Things, listed by Gartner in their Top 10 Strategic Technology Trends - 2015. The 'Internet of Things' (IoT) is the network of physical objects that contains embedded technology to communicate, monitor, sense or interact with multiple environments. IoT making devices, internet, people and processes converge in order to make our lives easier. It is aiding in the creation of smart cities and smart environments and hence intends to save time and money in every aspect.

As the Internet of Things progresses and becomes a part of our day to day lives, the industry will have to evaluate how a growing base of intelligent objects and equipment can be combined with traditional Internet and IT systems to support breakthrough innovations in operational performance or public service delivery. IoT is also opening real world opportunities and rapidly transforming our communities and societies. It encompasses more than 14 billion devices (thing) today, connected to the Internet which intends to improve business outcomes through the intelligent networked connections. These billions of devices connecting and communicating with each other raises a plethora of security challenges such as ubiquitous data collection and unexpected uses of user data to name a few. Moreover the devices may suffer from various software, firmware or hardware issues, and it is rare to find an IoT device that doesn't exhibit at least one critical failing. Now the food for thought is whether the change brought by IoT will result in lives becoming more convenient or will it result in our security being compromised.

In this seminar we focused upon this global phenomenon of IoT creating unprecedented economic opportunities to enhance productivity, sustainability and experiences, and enable the transformation of strategies required for IT services. It also threw some light on why many IT executives expect these business opportunities would force them to integrate devices despite the security risks, when they are aware and believe that IoT risks could become the biggest threats to their network.

The seminar helped to broaden the conception of the changes brought about in the industry with the onset of Internet of Things in the present era.
