ABOUT DATTANSH'22

Symbiosis Centre for Information Technology (SCIT) organizes an Annual Analytics Conclave every year, named DATTANSH, for all trending and up-coming technologies & applications in the world of Data Analytics. The 4th edition was held virtually on 22 January 2022 (on account of Covid lockdown).

Website: https://dattansh.scit.edu/

Theme - **DATA NOVA: Transcend Through Data**.

The amount of data that is currently collected and processed is perhaps the most spectacular result of the digital revolution. There has never been such an information explosion in human history. Smartphones, sensors, and connected vehicles and appliances, among other digital artifacts, are the reason behind this data explosion. Much of what we touch and work with now creates data automatically.

The data boom over the last ten years has generated a virtuous cycle of data analysis and action, resulting in new insights. As firms scramble to modernize their businesses and make data-driven decisions, we've seen them acquire more data than ever before.

Inspired by the word "supernova" which is the stellar explosion that occurs during the last evolutionary stages of a massive star. In the recent past, there has been a similar explosion in the world of innovation related to data and people are consistently pushing the boundaries causing a metamorphosis in the universe of data.

The tagline is derived from transcend which means to go above and beyond the usual limit. It shows how businesses have been surpassing their potential with the power of Data.

Sponsors:

The events were sponsored by Henry Harvin Education, a global edtech company based out of India and the USA, with a customer base in 97 countries and ranked among top 100 edtech companies of India. The organization extended its support for the event BizBoard, and conducted an hour-long preliminary event workshop for Power BI scheduled on 15/01/2022, via digital platform zoom, through which they gave a brief introduction about the basics of Power BI and its industrial applications. Apart from this, the sponsors provided the main dataset which was used for the BizBoard competition hosted on D2C.

2. Codehunters

Codehunters is a coding contest in which the participants get to showcase their problem solving skills via coding. A set of incomplete codes will be put forward in a cryptic manner to the participants which need to be solved sequentially to yield the answers. Generating the correct answers in every step is essential for the participant to make the next move and finish the complete code.

Respected Rakesh Sir,

Symbiosis Centre for Information Technology (SCIT) is a premier IT-B School offering a two year MBA in Information Technology Business Management (ITBM) and Data Science and Data analytics (DSDA).

Every year, we organize an annual analytics conclave, named Dattansh, for all up and coming technologies and applications in the world of Data Analytics.

The theme for the event held on 22nd January 2022, is DATA NOVA: Transcend Through Data to signify how businesses have been evolving and surpassing their potentials by unlocking the power of data.

We hereby cordially invite you to be a part of the 4th edition of Dattansh as our esteemed speaker and be a significant part of this enriching experience.

Due to the current circumstances, the event will be held online this time.

The event this year broadly includes 4-5 speakers and 2 product expos on the main day. Additionally, we host nation wide competitions to test and reward competence in coding and dashboard building. This year, we have partnered with Henry Harvin as our official sponsors who will be conducting insightful sessions on PowerBI as well. Our main aim remains to provide wholesome and quality exposure to all attendees.

Please acknowledge this official invitation. You may contact the following associates incase of any queries:

Rajan Gupta (Product Demo)

Research and Analytics professional with post-doctoral in Data Science and Modeling having more than 11 years of experience in research, consulting, teaching and training in areas like Public Sector, E-governance, Information System, Education, Health Care, Retail, Consumer Behavior and Market Research.
