Internet of Things Convenience or Compromise?

National Seminar at SCIT, for the past 16 years has been an inimitable platform to critically assess the State of IT and related industries, from multitude of dimensions. Over the period of time, National Seminar has become the platform where the best of the IT minds meet, understand and analyze the dynamics of the IT industry for the future.

State of IT'15 focuses on Internet of Things, listed by Gartner in their Top 10 Strategic Technology Trends - 2015. The 'Internet of Things' (IoT) is the network of physical objects that contains embedded technology to communicate, monitor, sense or interact with multiple environments. IoT is making devices, internet, people and processes converge in order to make our lives easier. It is aiding in the creation of smart cities and smart environments and hence intends to save time and money in every aspect.

As the Internet of Things progresses and becomes a part of our day to day lives, the industry will have to evaluate how a growing base of intelligent objects and equipment can be combined with traditional Internet and IT systems to support breakthrough innovation in operational performance or public service delivery. IoT is also opening real world opportunities and rapidly transforming our communities and societies. It encompasses more than 14 billion devices (thing) today, connected to the Internet which intends to improve business outcomes through the intelligent networked connections. These billions of devices connecting and communicating with each other raises a plethora of security challenges such as ubiquitous data collection and unexpected uses of user data to name a few. Moreover the devices may suffer from various software, firmware or hardware issues, and it is rare to find an IoT device that doesn't exhibit at least one critical failing. Now the food for thought is whether the change brought by IoT will result in lives becoming more convenient or will it result in our security being compromised.

In this seminar we would focus upon this global phenomenon of IoT creating unprecedented economic opportunities to enhance productivity, sustainability and experiences, and enable the transformation of strategies required for IT services. It will also throw some light on why many IT executives expect these business opportunities would force them to integrate devices despite the security risks, when, they are aware and believe that IoT risks could become the biggest threats to their network.

We strongly believe that the seminar will help to broaden the conception of the changes brought about in the industry with the onset of Internet of Things in the present era.

CHIEF GUEST

Mahesh Sonavane

Vice President, SunGard India

Mahesh Sonavane has been working in IT for over 26 years. He has a diversified experience in managing large scale Information Security operations, IT Infrastructure operations, Business Continuity programs, Process Improvement initiatives and Application Software delivery managements. He has presented at prestigious conferences and forums such as ISACA and many others in the field of Information Systems, Information Technology Infrastructure, Information Security and Cloud Computing Security. He was honoured with the Top 50 Promising CISO award from InfoSec Maestros - 2015. He has held certifications such as CISM, CRISC, ISO 27001 Lead Assessor, Privacy Lead Assessor, Six Sigma Green Belt, Global CIO from ISB and BCM Specialist.

GUEST OF HONOUR

Sougat Ghosh

Vice President, Nomura Services

Sougat Ghosh has been a leader having transformed some of the large multi-nationals including IBM, Computer Associates, Nortel Networks, HCL to name a few and influenced many of their clients. In the last 16 years, his journey has spanned from leading innovative technologies, driving consulting services, information security management, incident investigation, software engineering, operational risk management and lead process/technology simplification for some of the large Fortune 500 organizations. He has been a trusted advisor by global clients and led large multi-cultural teams to achieve the stated objectives in a timely manner. Sougat has assisted some of the government agencies and corporate meet regulatory, legal and policy requirements across the various geographies.

Panel of Speakers

Neelesh Kelkar

Leader - Smarter Cities & Integrated Townships, IBM India

Neelesh Kelkar is responsible for Smarter (Integrated) Cities and Smarter Building business in India & South Asia which is a strategic initiative under smarter planet initiative of IBM and is currently driving this business initiative and providing platform and solutions to clients. He has been working in Buildings & Infrastructure industry for the last 11 years and has held key roles with major Building Management OEMs & has worked with many systems integrators while working in the building industry. He has been a technical committee member of the Bureau of Indian Standards for Home Automation and is a member of the CCI Future Cities national level committee.

Neelesh Mantri

Deputy General Manager-IoT & Smart Cities, Tata Teleservices

Neelesh Mantri is leading the IoT and smart city practice at Tata Teleservices. He has over 13 years of experience in product management and has launched successful projects in the IoT domain. He has worked in several national and international projects in IoT specifically in energy domain. He has worked in various organizations like Wipro, Secure meters and Tata Teleservices, and has expertise in product, services and telecom. In addition to leading Tata Teleservices efforts in IoT / M2M space, he is the Chairman of the "Safety and Surveillance" working group in TEC forum setup by "Department of Telecommunication".

Nikhil Kulkarni

Associate Director-IT Advisory, KPMG

Nikhil Kulkarni has been working in the IT Advisory practice at KPMG for over 10 years. With projects ranging from IT Strategy implementation, Technology led Business Transformation, Identification and Implementation of solutions such as Mobility, Cloud and Social media, Nikhil Kulkarni has been at the forefront of dealing with emerging technologies. He has co-authored many publications for prestigious forums such as FICCI, CII, and Computer Society of India etc. In personal life, Nikhil is an avid blogger, tinkerer and Social Media enthusiast. He also mentors student startups at his Alma Mater NITIE.

Panel of Speakers

Prashant Deshpande

Chief Information Security Officer, Shriram Group

Prashant Deshpande has over 18 years of IT industry experience. He has held certifications such as CISA, CISM, PCI DSS and COBIT foundation. He has been deeply involved in the implementation of the ISO 27001 certified information security management system at all the Shriram Group subsidiaries.

Taral Soni

Lead - Mobility & IoT, PwC

Taral Soni leads emerging technology and IoT unit for PwC, India. In this role, he focuses on application of IoT in the financial services industry. Before joining PwC, he setup the Mobility and IoT Practice for 3i Infotech globally. During this period he created presence in 8 countries and built a multi-million dollar business. During his tenure with KPMG, he helped the firm setup Enterprise Mobility unit. Prior to joining 3i Infotech, he worked for ICICI Prudential where he envisaged and executed first-ever mobile distribution channel and also led the green-field Digital Transformation project. He is also on the advisory committee of a leading mobile app startup where he extends technology expertise on mobile platforms.

Varun Haran

Principal Correspondent, ISMG

Varun Haran has been a technology journalist in the Indian market covering enterprise technology for more than five years, specializing in the information security domain within IT. Prior to joining Information Security Media Group, a US-based business to business publication focused on information security, Mr Haran was a correspondent with TechTarget and InformationWeek, where he covered enterprise technology-related topics for the CXOs and IT practitioners. He has driven industry events such as the India Computer Security Conference (ICSC), and the first edition of the Ground Zero Summit, in 2013. He has been involved in planning and executing numerous industry round-tables and conferences over the years.

INSIGHTS FROM PAST

15th National Seminar

State of IT'14, "Mobile Device Diversity: Empowerment or End of Privacy?" emphasized on Diversification of mobile devices and consumer-driven Bring Your Own Device (BYOD) culture pressurizing the IT leaders to give enterprise end users a wider range of device choices. The seminar focused upon the growing variety of devices, computing styles, user contexts and interaction paradigms making "everything everywhere" strategies achievable. It was also discussed how organizations will be expected to define a managed diversity model as a structured compromise that offers an end-user device choice while protecting enterprise assets and supporting end-user productivity.

14th National Seminar

The seminar emphasized on State of IT' 13, "Big Data Analytics: Turning Insights into Action". It was discussed how exponential growth in data volume and variety has created new information management challenges. Today the traditional database technologies cannot keep pace with the rate of change in the industry and most firms tend to spend excessive time, money, and resources to maintain inflexible legacy systems. Thus it was discussed that the value in Big Data is in being able to aggregate all these new information sources into a unified platform to gain new insights and knowledge.

13th National Seminar

State of IT'12, with the theme "Where IT conquered new Frontiers" emphasized on various facets of IT with a prime focus on BFSI & consulting domain. It was discussed how BFSI is looking at newer ways to make a customer experience more convenient, efficient, and effective. Technology today is no longer just an enabler, but has become the business driver. IT has enabled reliable techniques helping financial intermediaries diversify globally along with highlighting the various risks and challenges faced. It also brought lots of insights on the growth of the internet, mobile and communication technology adding a different dimension to Banking and Consulting domain.

PROGRAM SCHEDULE

Time	Topic	Speakers
10:30 AM	Registration	
10:35 AM	Inauguration	
10:45 AM	Welcome Address	Dr. Dhanya Pramod Director - SCIT
10:50 AM	Address by Vice Chancellor	Dr. Rajani Gupte
11:05 AM	Address by Principal Director	Dr. Vidya Yeravdekar
11:15 AM	Address by Chancellor	Dr. S.B. Mujumdar
11:25 AM	Address by Chief Guest	Mahesh Sonavane Vice President - SunGard India
11:55 AM	Address by Guest of Honour	Sougat Ghosh Vice President - Nomura Services
12:25 PM - 1:25 PM	Panel Discussion - Internet of Things: <i>Convenience or Compromise?</i>	Neelesh Kelkar, <i>Leader,</i> Smarter Cities & Integrated Townships - IBM India Neelesh Mantri, <i>Deputy General Manager,</i> IoT & Smart Cities - Tata Teleservices Nikhil Kulkarni, <i>Associate Director,</i> IT Advisory - KPMG Prashant Deshpande, <i>CISO,</i> Shriram Group Taral Soni, <i>Lead,</i> Mobility & IoT - PwC Varun Haran, <i>Principal Correspondent,</i> ISMG
1:50 PM - 1:40 PM	Q & A Session	All Panel Experts
1:40 PM - 1:45 PM	Vote of Thanks	Dr. Kanchan Patil Deputy Director - SCIT
1:45 PM Onwards	Lunch
